

FRUIT TREES 2023

Varieties, prices and their description

- Apple 'Courtland'** **\$119.99** / *Semi-dwarf maturing to 15'x14'*. Red flushed green fruit McIntosh-type of medium size are good for juicing, fresh eating and cooking. Partially self-fruitful, midseason blooming.
- Apple 'Fuji'** **\$99.99** / *Semi-dwarf maturing to 12'x12'*. Rose flecked skin over a yellow-green background. White flesh is crispy and juicy, best for storing, fresh eating, baking, and applesauce. Needs a pollinator. It is a mid to late season bloomer.
- Apple 'Honeycrisp'** **\$99.99** / *Semi-dwarf maturing to 15'x14'*. Red over yellow 3" fruits are exceptionally crisp and juicy. Excellent for both fresh eating and cooking, one of the best keepers. Needs a pollinator. It is a mid-season bloomer so it is pollinated by most varieties. Good scab resistance.
- Apple 'Jonathan'** **\$119.99** / *Semi-dwarf maturing to 15'x14'*. Dark red fruits have a good balance of sweet and tart flavor so good for fresh eating as well as pies. Partially selffruitful, mid-season bloomer.
- Apple 'Liberty'** **\$119.99** / *Semi-Dwarf maturing to 15'x14'*. Red over green, multi-purpose McIntosh type apples that are small to medium sized with good flavor, somewhat tart. The tree itself is very disease resistant, good for organic gardening. Needs a pollinator, early to mid-season blooming.
- Apple 'Macoun'** **\$119.99** / *Semi-dwarf maturing to 15'x14'*. A McIntosh-type medium-large apple with red over green skin and firm white flesh. Needs a pollinator, mid to late season blooming. Best for fresh eating.
- Apple 'Zestar'** **New** **\$119.99** / *Semi-dwarf maturing to 15'x14'*. An extra cold hardy bred apple with firm, sweet-tart flesh and mostly red skin. A good storer, may last for many weeks in the refrigerator, also firm enough for baking. Needs a pollinator, early to mid season blooming.
- Asian Pear 'Shinseiki'** **\$119.99** *Matures to 15'x10'*. Smooth yellow fruit with little russet and firm juicy flesh with a hint of spice. Ripens over several weeks starting in August. Moderate fireblight resistance. Self-pollinating.
- Crabapple 'Centennial'** **New** **\$119.99** / *Semi-dwarf maturing to 15'x14'*. Large, sweet orange/yellow crab apples ripen early season. Good for fresh eating, best for cooking. Needs a pollinator, It is a mid-season bloomer so it is pollinated by most varieties, a good pollinator for any other apple.
- Paw Paw** **\$8.99** / *Asimina triloba* / *Matures to 25 feet tall by 15' wide, possibly larger*. Easy to grow native fruit tree with large tropical looking leaves and interesting maroon flowers. Large sweet fruit ripens in fall and is very flavorful as well as nutritious. 2-3+ trees are needed to ensure pollination.
- Pear 'Bartlett'** **\$119.99** / *Semi-Dwarf maturing to 15 tall by 10' wide*. Popular pear with excellent flavor. Fruits at a young age. Greenish-yellow fruit with creamy-white flesh that is juicy and aromatic. Good fresh eating or canning. Needs another variety for pollination, such as 'D'Anjou', although there are reports of it being self-fruitful. Easy to grow without spraying; just look out for fire blight.
- Pear 'Kieffer'** **\$119.99** / *Semi-Dwarf maturing to 15 tall by 10' wide*. Solid yellow fruit with firm white flesh. Ripens late season, usually October. Good for cooking, baking and preserves. Self-pollinating, more fruit are produced with another Pear variety.
- Persimmon** **\$8.99** / **\$23.99** / *Diospyros virginiana* / *Matures to 55' tall by 30 feet wide*. Large native tree with pale orange fruit that ripen in late October are the sweetest after the first hard frost. 2-3 trees are needed to ensure pollination. Trees may take 10-15 years to start bearing fruit.
- Persimmon 'Golden Delight'** **\$148.99** / *Diospyros virginiana* / *Matures to 55' tall by 30 feet wide*. Improved Persimmon with large golden-orange fruits that mature up to a month earlier than the species. Another tree is needed to ensure pollination. Trees may take 10-15 years to start bearing fruit.
- Persimmon 'Magic Fountain'** **\$199.99** / *Diospyros virginiana* / *Matures to 12' tall by 6 feet wide*. A vigorous and healthy plant with a tight weeping habit. Sweet orange fruit is about the size of the species, but very prolific. 1 other persimmon is needed for pollination, will pollinate with wild specimens.
