

# HYDRANGEAS 2023

*Varieties, description and culture.....*

*The prices listed are for use as a general guideline and are subject to change*

<b>Annabelle</b>	<b>\$54.99</b> <i>Hydrangea arborescens / 4-5' tall by 8' wide / Sun (If moist) or shade / An old but easy to grow favorite with rounded white heads that age to green before eventually turning brown</i>
<b>Big Easy</b>	<b>\$39.99</b> <i>/ Hydrangea macrophylla / 2.5' tall by 3' wide / Shade or morning sun / Very large bubblegum-pink blooms are long lasting due to thick substance, adding to the life as it transitions through many colors. The color is not changeable to blue. A re-bloomer from the Proven Winners Lets Dances series. Nice disease resistant foliage and a reliable bloomer, even after a hard winter.</i>
<b>Bloomstruck</b>	<b>\$44.99</b> <i>Hydrangea macrophylla / 3' tall by 3.5' wide / Shade or morning sun / From the Endless Summer family, Bloomstruck features a slightly smaller size with the same re-blooming tendencies with pink or blue flowers. In addition, it differs in having red stems and wine fall color, as well as somewhat glossy foliage that is more resistant to afternoon sun and heat.</i>
<b>Blue Jangles</b>	<b>\$44.99</b> <i>/ Hydrangea macrophylla / 2.5' tall by 3' wide / Shade or a few hours of afternoon sun / A shorter selection that readily reblooms on new growth. Deep blue when aluminum sulfate is added.</i>
<b>Bobo</b>	<b>\$44.99 / \$49.99</b> <i>/ Hydrangea paniculata / 3' tall by 4' wide / 3+ hours of sun / A dwarf fall blooming hydrangea forming a compact mound. Prolific heads of airy white flowers may be showy for 2 months or more. Early blooming for the species, it also blooms all around the plant, not just the top.</i>
<b>Can Do!</b>	<b>\$32.99 / \$44.99</b> <i>/ Hydrangea serrata / 3' tall and wide / Shade or morning sun / Silvery pink in alkaline soil, or periwinkle violet with aluminum sulfate. A proven Winners selection that they claim is their strongest and fastest rebloomer.</i>
<b>Fire Light</b>	<b>\$49.99</b> <i>/ Hydrangea paniculata / 6' tall by 5' wide / 5+ hours of sun / Thick stems hold up the large and full white blooms in late summer and turn a rich reddish-pink and persist for many weeks. A Proven Winners selection. Limited supply in the spring.</i>
<b>Fire Light Tidbit</b>	<b>New \$44.99</b> <i>/ Hydrangea paniculata / 3' tall by 3' wide / 5+ hours of sun / A late display of bright lime green blooms that age to deep pink. Leaves may develop some appreciable fall color.</i>
<b>Incrediball</b>	<b>\$29.99</b> <i>/ Hydrangea arborescens / 4-5' tall and wide / Sun (If moist) or shade / An improved version of the old 'Annabelle' with 2-4 times larger blooms and strong stems. A hardy and reliable bloomer. Lightly fragrant. The blooms are not affected by pH. Cut back annually for best results.</i>
<b>Invincibelle Lace</b>	<b>\$29.99</b> <i>/ Hydrangea arborescens / 5' tall by 5' wide / Sun (If moist) or shade. Plum-purple florets surrounded by soft pink bracts. An easy to grow native with nectar-rich flowers. A PW selection.</i>
<b>Limelight</b>	<b>\$44.99 / \$49.99</b> <i>/ Hydrangea paniculata / 7' tall by 5' wide / 3+ hours of sun. Leaves emerge greenish white before turning to all white.</i>
<b>Limelight Prime</b>	<b>\$44.99</b> <i>/ Hydrangea paniculata / 6' tall by 5' wide / 5+ hours of sun. A new an improved 'Limelight', it has a longer lasting greenish white blooms, healthier foliage, and a more compact habit.</i>
<b>Little Lime</b>	<b>\$29.99 / \$44.99</b> <i>/ Hydrangea paniculata / 4' tall by 3' wide / 5+ hours of sun. A dwarf form of the popular 'Limelight', standing about a third of the size. It sports the same lime to white to pink blooms.</i>
<b>Little Lime Punch</b>	<b>\$44.99</b> <i>/ Hydrangea paniculata / 4' tall by 3' wide / 3+ hours of sun. Like the above, blooms start off greenish-white, turn pure white, then to pink and finally to a rich red, often a multicolored effect.</i>
<b>Little Quick Fire</b>	<b>\$44.99</b> <i>/ Hydrangea paniculata / 4' tall by 5' wide / 3+ hours of sun / Lacecap-type blooms appear in early summer and turn red before many other paniculata-types are budding.</i>
<b>Miranda</b>	<b>New \$79.99</b> <i>/ Hydrangea anomala / climbing to 25' / 3+ hours of sun / The typical white flowers of the species, with the added interest of broad yellow variegation of the leaves.</i>

*Varieties, description and culture.....*

<b>Munchkin</b> .....	<b>\$54.99</b> / <i>Hydrangea quercifolia</i> / 3' tall by 4.5' wide / Sun (If moist) or shade / A new dwarf oak leaf variety that features fuller blooms that are somewhat rounded, born in June.
<b>Petiole</b> .....	<b>\$79.99</b> / <i>Hydrangea anomala</i> / climbing to 25' / 3+ hours of sun / Relatively slow growing deciduous clinging vine that bear flat white clusters in June. Works well on a brick wall or as a groundcover. Eventually forms a layered look with peeling bark. Takes several years to bloom.
<b>Pinkerella</b> .....	<b>\$54.99</b> / <i>Hydrangea arborescens</i> / 5' tall by 5' wide / Sun (If moist) or shade. Vigorous mophead type with reliable two-tone pink blooms that last for months. Bloom color is constant.
<b>Pinky Winky</b> .....	<b>\$44.99</b> / <i>Hydrangea paniculata</i> / 7' tall and wide / 3+ hours of sun / Large, 12-16" long heads in mid-summer emerge white, quickly turn pink, and continue to push new white flowers from the tip of the panicle, creating a bicolor effect. The blooms are not affected by pH. Cut back annually for larger blooms.
<b>Ruby Slippers</b> .....	<b>\$84.99</b> / <i>Hydrangea quercifolia</i> (oak leaf) / 3.5' tall by 5' wide. Sun (If moist) or shade / In June, 9" long conical flower heads emerge white, quickly turning pink and then eventually to a rose color. The blooms have a heavy substance that helps them last. Mahogany fall color. Vigorous.
<b>Smooth Hydrangea</b> .....	<b>\$8.99</b> / <i>Hydrangea arborescens</i> / 4-5' tall, 4-5' wide / Sun (If moist) or shade / Sweetly scented flat creamy white blooms occur on new wood in early summer. Attracts a wide variety of pollinators and is tolerant of most conditions, very hardy. Indiana native. We will also have the subspecies
<b>Summer Crush</b> .....	<b>\$44.99</b> / <i>Hydrangea macrophylla</i> / 2.5' tall by 3' wide / Shade or morning sun / Rounded Mophead blooms of deep rose or bright purple. Compact, handles a little sun better than previous Endless Summer selections.
<b>Tuff Stuff Red</b> .....	<b>\$49.99</b> / <i>Hydrangea serrata</i> / 3' tall by 4' wide / Light shade or some afternoon sun / Reliable double lacecap-type blooms in shades of pinkish-red. A Proven Winners selection.
<b>Also available in Tree Form;</b>	
<b>Limelight</b> .....	<b>\$189.99</b>
<b>Pinky Winky</b> .....	<b>\$189.99</b>
<b>Vanilla Strawberry</b> .....	<b>\$189.99</b>

**Hydrangea Culture:** All hydrangeas prefer soil that is high in organic matter and worked deeply enough to encourage maximum rooting. Moist soil that is well drained is ideal. Some varieties are adaptable to sun or shade, although more abundant blooms occur in more of a bright or sunny area. More sunlight means more water as well, as the large leaves lose water quickly on a hot day. The Japanese (*macrophylla*) hydrangea only prefers morning sun; otherwise the leaves may wilt and scorch if too sunny. Hydrangeas are heavy feeders and need a balanced fertilizer to maximize growth and bloom rate, yet be sure to stop fertilizing in August to allow recent growth to harden off for winter. Although not a fertilizer; aluminum sulfate may be added once or twice a year to help turn Japanese Hydrangeas blue, or alternatively add lime to make them pink. All hydrangeas listed above bloom on the new growth of the season. This means they will still bloom the summer even if they were pruned back to the ground or froze the previous winter. The only exception would be the oak leaf varieties, which are best if given their allotted space and not pruned much at all.
